GRAVITA INDIA LTD — Key Risks Register

Structured risk assessment | Sector: Metal & Metal Products | Source: Tikona Research

#	Risk Category	Risk Factor	Description	Mitigation	Probability	Impact	Overall Rating
1	Regulatory	Environmental compliance and licensing delays	Capacity expansion projects dependent on state-level consent-to-operate licenses, with recent delays in Gujarat affecting timeline.	Proactive engagement with regulatory authorities and maintaining buffer timelines for project completion	M	H	MEDIUM
2	Market	Commodity price volatility	Aluminum and plastic recycling exposed to price fluctuations due to lack of effective hedging mechanisms unlike lead operations.	Gradual introduction of aluminum hedging on MCX and focus on value-added products with stable margins	H	M	MEDIUM
3	Operational	Raw material scrap availability	Dependency on consistent scrap supply from domestic and international sources, with geopolitical tensions affecting import logistics.	Diversified supplier network across 70+ countries and increasing domestic scrap sourcing to 60%+	M	H	MEDIUM
4	Competition	Market share erosion from organized players	Entry of large corporations and battery OEMs into recycling space could intensify competition and margin pressure.	Strong brand relationships with OEMs, technical expertise, and focus on value-added products differentiation	M	M	LOW
5	Execution	New vertical scaling challenges	Lithium-ion, rubber, and copper recycling ventures require different technical expertise and market development than core lead business.	Pilot projects, strategic partnerships, and phased capacity additions with continuous monitoring of returns	H	M	MEDIUM
6	Financial	High capital expenditure execution risk	Rs 1,225cr capex plan through FY28 requires efficient capital allocation and project management across multiple geographies.	Disciplined ROIC benchmark of 25% for new investments and focus on brownfield expansion to reduce risks	M	H	MEDIUM
7	Economic	Global economic slowdown impact	Reduced industrial activity and infrastructure spending could affect demand for recycled metals and scrap availability.	Diversified end-user industries, export market presence, and focus on essential applications like batteries	M	M	LOW
8	Technology	Technological obsolescence in recycling processes	Rapid advancement in recycling technologies could make current processes less competitive or require significant upgrades.	Continuous R&D investment, technology partnerships, and regular equipment upgrades to maintain efficiency	L	M	LOW
